COR-0259
Copy 2

19 December 1958

MEMORANDUM FOR: Director of Development & Procurement, DPS/DCI

SUBJECT : Processor and Printer

REFERENCE : Memorandum for SA/PD/DCI, dated 15 December 1958, from R&D Officer (COR-0278)

25X1A

1. I have read the reference and am now satisfied that the Speltron processor is the proper choice for handling CORONA materials at Eastman Kodak. You should make sure that a file containing the reference and also [redacted] draft letter of 19 November, my memorandum (COR-0211) and the trip report from the Director of Operations (COR-0238) is kept as a record of our review of this matter.

25X1A

2. [redacted] remarks in paragraph 6. of the reference on the printer available at Eastman are somewhat less convincing but I am quite ready to rely on his judgment.

3. I would appreciate if you would advise me whether it has been proposed that we should purchase a processor or one or more printers or other equipment for installation at Rochester. I assume we will either have to pay for such equipment or pay a rental to Eastman. In addition to the answer to this question I am interested in an estimate of the costs we are likely to incur at Eastman in the current fiscal year and FY-1960 in connection with the CORONA processing.

By me
RICHARD M. BISSELL, JR.
SA/PD/DCI
